Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This office action is in response to applicants' communication filed on 9/23/04.

Claims 3 and 8-11 are pending in this application. Claims 1-2 and 4-7 have been canceled.

Rejection of claims 3 and 8-10 under 35 USC 112 2nd paragraph is hereby withdrawn subsequent to applicants' amendment.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 3, 8 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Duyck et al(US 2003/0030033, filing date of the Provisional application is 12/30/1999).

Duyck et al, page 11, example 3, [0156] anticipate instant claimed compounds, when in the instant claims, R3 is isopropyl, m and n are 0.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1621

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 3 and 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duyck et al.

Duyck et al, teach structurally similar compounds as claimed herein. See for example, compound [0114] on page 7. Note R3 and R4 can be alkyl, R5 can be diphenyl amino, B can be alkylene, page 4, [0055], [0059] and [0061]. Also, see compound on page 11, [0156].

It would have been prima facie obvious to one of ordinary in the art at the time the invention was made to obtain compounds within the generic disclosure of the reference,

Art Unit: 1621

because they are structurally so similar to those claimed herein, and substituents are similar to those claimed herein, with the reasonable expectation of achieving claimed compounds, absent evidence to the contrary.

7. Applicants should amend claim 11, deleting R1 and R2 to be hydrogen, because when m and n are 0, there is no R1 and R2. Additionally, R1 and R2 are no where defined as hydrogen.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHAIENDRA - KUMAR whose telephone number is (571)272-0640. The examiner can normally be reached on Mon-Thur 8:00-5:30, Alt Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on (571)272-0646. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
